

Experiment-6 write a python program for vaccum cleaner problem

```
vacuum cleaner problem.py - C:/Users/prana/OneDrive/Desktop/vacuum cleaner problem.py (3.13.14)
File Edit Format Run Options Window Help

room = {
    "A": "Dirty",
    "B": "Dirty"
}

position = "A"

print("Initial State:", room)

while "Dirty" in room.values():

    if room[position] == "Dirty":
        print("Vacuum cleans", position)
        room[position] = "Clean"

    elif position == "A":
        print("Move from A to B")
        position = "B"

    else:
        print("Move from B to A")
        position = "A"

print("Final State:", room)
print("Both rooms are Clean!")
```

```
IDLE Shell 3.13.14
